

Title

What is a suitable title?

Introduction

What is your research about? What background information has informed your aim and hypothesis?

Methods

How did you do the research? What equipment did you use? [when, where, how and what]

Results

RESULTS 

How will you represent your data? What do your results indicate?

Discussion

What does your data mean? Does your data support or refute your hypothesis?
What would you have done differently?

Acknowledgements

Who do you need to thank for any part of this research (e.g. field work)?

References

Where did you get information contained in this report (other than your own observations and knowledge)?
